Investigation report

CR-2026-00192 | Investment Scam | Action Required

From Reported Wallet to Actionable Intelligence

Reported loss	Terminal traced value	Candidate confidence	Network
INR 812,450.00	INR 642,000.00	91%	47 transactions / 18 wallets

01 / Case and complaint information

Case ID	CR-2026-00192
Complaint ID	DEMO-NCRP-00192
Fraud type	Investment Scam
Reported wallet	0x648d165d3cd5aac5a6e931401a11535498e86cb2
Blockchain / currency	Ethereum / INR
Priority / risk	High / 83 of 100
Description	Fictional synthetic training complaint. No real victim, VASP or criminal allegation. Amounts are simulated INR-equivalent bookkeeping, not live token prices.
Attachment metadata	[{"name": "synthetic-complaint.txt", "type": "text/plain", "size": 824, "description": "Demo metadata only; no attachment uploaded."}]
Generated / version	2026-09-24T11:01:28.290Z / v1

02 / Scope, source and evidentiary limitations

This report uses deterministic synthetic investigation data. Wallets and VASP entities in the demo are fictional fixtures. Monetary values are INR-equivalent scenario amounts, not token valuations, exchange rates or evidence of actual transfers. New reported addresses are inputs to the simulator; no live blockchain query was performed.

Investigative intelligence output. Attribution represents analytical confidence and requires appropriate human/legal verification. The system does not identify wallet owners, access private KYC, freeze assets, deanonymize mixers, contact exchanges or make legal determinations.

03 / Actionable exit

Strongest candidate: VASP-X | Attribution confidence 91% | Terminal value INR 642,000.00

7 terminal transactions across Ethereum, Polygon; 8 intermediary hops. First interaction 2026-09-23T14:57:00.000Z; last interaction 2026-09-23T15:04:11.000Z.

1. Preserve the transaction hashes, timestamps and synthetic data-source labels in the evidence package.

2. Review intermediary wallets and validate all candidate cluster associations against independently obtained records.

3. Prepare an authorized information-request package for candidate VASP-X; do not infer ownership or KYC from this prototype.

4. Review related complaints and corroborate shared-wallet or cluster evidence.

5. Obtain appropriate human and legal verification before investigative action.

04 / Transaction summary and fund flow

The persisted network contains 47 transaction records and 18 wallets across Ethereum, Polygon. Traced value counts terminal VASP inflows once; intermediate transfers and bridge representations are not added again.

05 / Cross-chain movement

Reference / bridge	Source -> destination	Amount	Observed / transaction hash
BR-001 / DemoBridge	Ethereum -> Polygon	INR 650,000.00	2026-09-23T14:47:00.000Z 0x7e4e7e5038dfd35e8486ffa2fe7904b1b93062c36beaf5bc63206e56de179d29

Bridge linkages are explicit synthetic fixture evidence. Time/value proximity alone would not establish a cross-chain ownership link in a live investigation.

06 / Fraud flow fingerprint

Rule-based investigative pattern classification; not a machine-learning verdict or proof of a crime. Scores describe similarity within this synthetic dataset.

Pattern consistent with	Score	Evidence / rationale
Investment Scam Pattern	81.1%	Pattern consistent with this rule-based profile. Consolidation, candidate service deposits and cross-chain movement match a synthetic investment-flow profile. Scores are relative similarities, not probabilities or proof of crime. References: EV-risk-consolidation, EV-risk-crossChain, EV-deposit
Task Scam Pattern	10.5%	Pattern consistent with this rule-based profile. Short holding times and repeated forwarding match a synthetic task-payment dispersal profile. Scores are relative similarities, not probabilities or proof of crime. References: EV-risk-velocity, EV-risk-dispersion

Pattern consistent with	Score	Evidence / rationale
General Laundering Pattern	8.4%	Pattern consistent with this rule-based profile. Dispersion, bridge use or privacy exposure match a synthetic layering profile; these behaviors also have legitimate uses. Scores are relative similarities, not probabilities or proof of crime. References: EV-risk-crossChain, EV-risk-dispersion

Deterministic behavioral rules; similarities are not calibrated probabilities. Asset composition is unavailable because transactions use synthetic INR equivalents.

Behavioral feature	Observed value

07 / Candidate VASP attribution and supporting evidence

VASP-X / 91% confidence / INR 642,000.00

Confidence = sum(evidence score x configurable evidence weight) / 100. It is an explainable heuristic, not a calibrated probability or verified ownership claim.

Evidence	Weight / score	Points	References and explanation
EV-cluster Address cluster relationship	25% / 96	24	3 terminal deposit wallets share a synthetic VASP cluster tag. Score = 70 + min(26, 9 × deposit wallets); cluster labels are fixture metadata, not independently verified ownership. Transactions: TX-041, TX-042, TX-043, TX-044, TX-045, TX-046, TX-047 Wallets: W-12, W-13, W-14
EV-pattern Repeated forwarding pattern	20% / 90	18	46 transactions originate from wallets with both receipts and payments. Score = 50 + min(40, 2 × forwarding transactions). Transactions: TX-002, TX-003, TX-004, TX-005, TX-006, TX-007, TX-008, TX-009, TX-010, TX-011, TX-012, TX-013, TX-014, TX-015, TX-016, TX-017, TX-018, TX-019, TX-020, TX-021, TX-022, TX-023, TX-024, TX-025, TX-026, TX-027, TX-028, TX-029, TX-030, TX-031, TX-032, TX-033, TX-034, TX-035, TX-036, TX-037, TX-038, TX-039, TX-040, TX-041, TX-042, TX-043, TX-044, TX-045, TX-046, TX-047 Wallets: W-02, W-03, W-04, W-05, W-08, W-09, W-10, W-15, W-07, W-06, W-11, W-16
EV-deposit Deposit-like transaction behavior	15% / 94	14.1	7 terminal receipts arrive at candidate cluster wallets. Score = 45 + min(49, 7 × receipts). This behavior alone does not establish exchange ownership. Transactions: TX-041, TX-042, TX-043, TX-044, TX-045, TX-046, TX-047 Wallets: W-12, W-13, W-14
EV-temporal Temporal correlation	15% / 88	13.2	Mean observed intermediary holding time is 4.71 minutes. The deterministic rule scores 88 below 60 minutes and 48 otherwise. Transactions: TX-002, TX-003, TX-004, TX-005, TX-006, TX-007, TX-008, TX-009, TX-010, TX-011, TX-012, TX-013, TX-014, TX-015, TX-016, TX-017, TX-018, TX-019, TX-020, TX-021, TX-022, TX-023, TX-024, TX-025, TX-026, TX-027, TX-028, TX-029, TX-030, TX-031, TX-032, TX-033, TX-034, TX-035, TX-036, TX-037, TX-038, TX-039, TX-040, TX-041, TX-042, TX-043, TX-044, TX-045, TX-046, TX-047 Wallets: W-02, W-03, W-04, W-05, W-08, W-09, W-10, W-15, W-07, W-06, W-11, W-16
EV-crossChain Cross-chain convergence	10% / 94	9.4	1 bridge transfer is explicitly paired in this synthetic fixture. Pairing scores 94; this is not independent live-chain validation. Transactions: TX-028 Wallets: W-08, W-07
EV-historical Repeated observed interaction	10% / 86	8.6	47 transactions support this observed flow. Score = 30 + min(56, 2 × observed transactions); no history outside this dataset is implied. Transactions: TX-001, TX-002, TX-003, TX-004, TX-005, TX-006, TX-007, TX-008, TX-009, TX-010, TX-011, TX-012, TX-013, TX-014, TX-015, TX-016, TX-017, TX-018, TX-019, TX-020, TX-021, TX-022, TX-023, TX-024, TX-025, TX-026, TX-027, TX-028, TX-029, TX-030, TX-031, TX-032, TX-033, TX-034, TX-035, TX-036, TX-037, TX-038, TX-039, TX-040, TX-041, TX-042, TX-043, TX-044, TX-045, TX-046, TX-047 Wallets: W-02, W-03, W-04, W-05, W-08, W-09, W-10, W-15, W-07, W-06, W-11, W-16

Evidence	Weight / score	Points	References and explanation
EV-external Synthetic knowledge-base tag	5% / 74	3.7	The fictional VASP registry supplies a demonstration-only reliability score of 74. No commercial attribution provider or government system is connected. Transactions: TX-041, TX-042, TX-043, TX-044, TX-045, TX-046, TX-047 Wallets: W-12, W-13, W-14

13 / Audit metadata and integrity

Report version: 1. Generated at: 2026-09-24T11:01:28.290Z. Dataset mode: SIMULATED INVESTIGATION DATA. Application: CRYPTO-TRACE INDIA. Generator: ReportLab / case-grounded server export. Actor: Demo Investigator.

After generation the service records the report SHA-256, version and timestamp in its session-scoped report register and audit trail. Hashes provide local integrity comparison only; this prototype does not provide a signed legal chain of custody.
